2 I spent some time searching for some info about orderBy in the v2 and didn't find this link. Thanks! – Christian Benseler Nov 9 '16 at 17:43

2 Do we need to load lodash library in order to use orderBy function? – lewis4u Jun 9 '17 at 19:39

1 Yes – you can install lodash in your project, and add this to your component: `import _ from 'lodash'` – kanga Aug 23 '17 at 18:12

7 No, you do not need lodash just to sort an array. – Daniel Beck Feb 7 '18 at 13:55

1 However take notice, on the Roadmap for v5.0.0 it is planned to *Discontinue per method packages in favor of modular lodash* – luckydonald Sep 12 '18 at 22:43

You can also use vue2 filters package.

1) First install it using npm.

```
npm install vue2-filters
```

2) Then, add it in your component or globally.

```
import Vue from 'vue'
import Vue2Filters from 'vue2-filters'

Vue.use(Vue2Filters)
```

3) After that use it in the template

```
<li v-for="c in orderBy(rooms,'last_iteraction')">
```

There is a list of predefined filters.check it out.
